SCOPE OF WORK

Siegfried shall provide preliminary and final engineering services leading to the completion of plans, specifications, and estimates for construction of the Downtown East-West Connection improvements. Siegfried will provide project management, coordination, and preparation of the documents presented in this scope of work. This work will include the following tasks:

Task 1 | Background Research

Task 1.1 | Background Research

Siegfried will conduct a field reconnaissance of the project area, research and review existing topographic mapping, right-of-way maps, "as-built" plans, record maps, surveys, assessor maps, improvement plans, review and verify the location and type of existing improvements, equipment, bus zone locations, intersection geometrics, posted speed limit signs, on-street parking, bus route movements, and other characteristics for the project.

Siegfried will also conduct field surveys that include collecting topographic information and locating and referencing any survey monumentation to be compromised by the project. Boundary surveys and plotting of road right of way on the improvement plans is not included in the scope of work as all improvements will be within existing City improved areas. Our team will utilize a utility locating service to identify pipe sizes and approximate depth at key existing utility crossings that will be identified as the scope of the project becomes more clear. The number of areas to receive locating is limited to four (4) crossings. The plans will illustrate existing structures, as well as rim and invert elevations for all underground and above ground utilities that conflict with or will be directly affected by the project improvements.

Siegfried will also conduct a pavement condition assessment within the project limits in the proposed bicycle facilities. The assessment will be visual only and no coring or testing is proposed.

Task 1.2 | Parking Study

Siegfried will conduct a field survey of the study area to inventory the total parking supply by block face (on-street). This review will include documenting the on-street parking supply by space type (unregulated, time limited, loading, etc.); noting the presence of disabled, loading or other markings; and documenting posted time restrictions and limits. The study area is assumed to be Park Street and Oak Street from Pershing Avenue to Airport Way, Fremont Street from Pershing Avenue to Baker Street, Fremont Street from Airport Way to Wilson Way, and one block of side streets in all directions.

Following the inventory, Siegfried and TJKM will a conduct comprehensive field occupancy survey of all accessible on-street spaces on Fremont only. Parking occupancy surveys determine the peak demand for parking systemwide and for each block face, the pattern of demand across the study area, and where/when there is excess parking available. The surveys will measure parking occupancies on one (1) typical weekday and on one (1) typical Saturday for all on-street spaces to determine occupancy by hour of day. The utilization counts will be taken hourly from 11 AM to 2 PM and 8 PM to 11 PM to ensure peak both residential and business parking demands are assessed.

TJKM will analyze parking utilization rates and patterns to assess the available capacity and the resulting ability for the existing supply to meet the current demand for the study area as a whole as well as for sub-zones within the study area (e.g. focused on residential and business districts). Peak hours of parking demand will be mapped, detailing usage at peak daytime and evening hours for all block faces in the study area. To estimate the future impact of on-street parking removal, the parking demands of side streets will be assessed to determine if there is sufficient available capacity to accommodate spillover.

TJKM will sub consult with a data collection vendor to collect intersection turning movement counts (vehicles, bicycles, and pedestrians) at three intersections (one for each corridor). The location of the intersection will be identified with consultation with the City prior to counting. At each of the count locations, four total hours on three weekdays (Tuesday, Wednesday, and Thursday) at 7 to 9 AM and 4 to 6 PM and one weekend day (11 AM- to 1 PM) will be counted per Interim ATP Count Methodology guidelines

Task 2 | Utility Coordination

Siegfried will be responsible for performing utility investigations and coordination with utility owners throughout the project development process. Our team will be present at all necessary meetings with each utility owner. We will be responsible, but not limited to, the following: Prepare a project limits map and request utility information from each utility owner within the area of work.

Prepare a project limits map and request utility information from each utility owner within the area of work.

Prepare Utility Letter "A" during preliminary design phase to the affected utility owners for City to review and approve prior to transmitting to utility owners. Information on existing utilities obtained as a result of the "A" letter will be transferred to base maps in both plan and profile view. A copy of the utility data obtained from utility owners will be provided to the City and the originals will be filed in the project files.

Prepare Utility Letter "B" during 50% design phase to the affected utility owners for City to review and approve prior to transmitting to utility owners. Two sets of half-sized 50% plans will be provided to each utility owner as an attachment to the letter. The letter will request that utility owners verify any utility conflicts with proposed improvements and indicate whether any future utilities are proposed in the area that may require accommodation through the improved area. Information on existing utilities obtained as a result of the "B" letter will be used to determine potential utility conflicts and to resolve the conflicts identified. A copy of the utility data obtained from utility owners will be provided to the City and the originals will be filed in the project files.

Prepare Utility Letter "C" during 100% design phase to the affected utility owners for City to review and approve prior to transmitting to utility owners. Two sets of half-sized 100% plans will be provided to each utility owner as an attachment to the letter. The letter will indicate to the utility owners whether any changes have been made to the project plans since the Utility Letter "B" and will request written confirmation of utility relocations and utility relocation schedule. A copy of the utility data obtained from utility owners will be provided to the City and the originals will be filed in the project files.

Siegfried will meet with utility companies as needed to ensure that conflicts are identified, and relocations performed if necessary.

See Task 1.1 for utility locating scope.

Task 3 | Plans, Specifications, and Estimate (PS&E)

Siegfried will prepare and complete PS&E documents, which include design improvement plans for demolition, grading, striping, electrical, drainage, paving, staging, erosion control, traffic control, and other civil details as well as technical specifications, and engineer's estimate. We will prepare a base map showing existing information to facilitate the design of all the necessary improvements in accordance with the City of Stockton Standard Plans and Specifications, current Caltrans Standard Specifications, and current MUTCD, as appropriate. The base map prepared will show existing information to facilitate the design of all the necessary improvements using the City's latest Benchmark information. The base map limits will be sufficient to cover all necessary improvements within the project area. The project will use the existing curb-to-curb width and back of walkway and round corner limits. We will conform the design to comply with Americans with Disabilities Act (ADA).

Siegfried will provide PS&E documents to the City for review at 50%, 90%, and 100% completion stage, along with the following deliverables at each design stage:

One set of full size, 24"x36" plans (PDF)

One set of specifications (PDF, Word)

Engineers estimate (PDF/Excel)

Siegfried will utilize Bluebeam software for the PDF submittals. With each stage of review, our team will review and incorporate comments, create a comment matrix to track all comments, and provide a signed Quality Control Checklist. Any comments not incorporated into the submittals shall be tracked and justification provided in the comment matrix. Siegfried will submit a comment response matrix from the previous submittal with the proceeding PS&E submittal at each design stage.

Siegfried will provide the City electronic copies of the PS&E after the 100% comments have been incorporated as a final check prior to plotting the plans on mylars. We will provide all correspondence and work products for City files.

F:\23projects\23236 City of Stockton Downtown East-West Connection\Marketing\Scope and Fee\23236 Downtown Connection Scope of Work Rev 1.docx

EXHIBIT 1 EXHIBIT A

Task 3.1 | 50% PS&E

The 50% design, at minimum, will include a basic geometric configuration of roadway striping layouts, curb alignments at round corner improvements, and typical cross sections. As Siegfried designs the project, we will take into consideration the turning motions of Stockton Unified School District, Stockton Fire Department, San Joaquin Regional Transit District, and Stockton Waste Management vehicles, as well as semitrucks with trailers.

Traffic signal timing for leading pedestrian intervals (LPI) will be calculated per Transportation Research Board 2198 at three signalized intersections (Park Street/Madison Street, Park Street/Wilson Way, Fremont Street/Wilson Way). At each location, TJKM will plot collision data from SWITRS database to ascertain the collision types occurring, conduct field observations at each intersection to check sight distance, measure the lane widths at each crosswalk, then prepare a brief memorandum with our findings and recommendations for the City to review. Based on comments from the City on the draft memorandum, a final memorandum will be prepared with the LPI values for the City staff to input and program into the controller assuming existing controller software has LPI capability.

Siegfried will develop the design to thoroughly identify the locations of utilities, right-of-way, geometric features, and other design elements. Project estimates and specifications will be included at this stage.

The following plan sheets will be included in the 50% PS&E submittal:

Signing and Striping Plans (Park Street, Oak Street, and Fremont Street).

RRFB Plans (3 Locations).

Signal Modification Plans (14 Locations).

Task 3.2 | 90% PS&E

Siegfried will review and itemize the comments from the 50% submittal and a written response to the comments will be prepared in a comment matrix. We will return the original red-line mark-up from the City with the succeeding submittal.

Task 3.3 | 100% PS&E

Siegfried will complete the design revisions from the preliminary design. Siegfried will provide detailed project estimates and specifications at this stage, and will provide the necessary final PS&E documents in a bid-ready form. Project files and the Project Engineer/Resident Engineer file will be submitted with the Final PS&E.

Quality Control

The PS&E will be subject to quality control reviews before submittal. These reviews will focus on conformance to City and Caltrans Standards. Siegfried will provide a signed Quality Control Checklist at the time of each deliverable submittal.

Task 4 | Public Outreach

Siegfried will research and develop a stakeholder database of potentially interested parties, which will be updated throughout the project with names from the public meetings, sign-in, information from the project team and from telephone, email and personal contact as well as the preferred method of contact, and potential key interest/concerns. The database will be coded according to the interest and involvement with the project. Among the groups on the stakeholders list will be the following:

Council members Susan Lenz and Brando Villapudua and other elected and appointed officials

Residents and property owners adjacent to the proposed project area

Businesses and other establishments adjacent to the project area

Emergency Responders

School District

Public Transit

The mailing list is limited to 1,000 locations. Siegfried will host, at minimum, two (2) Public Information Meetings to present concepts and design features to the neighboring residents and businesses, and to the public. In collaboration with City staff, Siegfried will determine the locations near the project site to have each meeting. The meetings will be designed primarily to provide information on the project features, goals, and construction impacts. Our team will schedule the meetings and make all meeting arrangements; write, design, and issue meeting notices by first-class mail to stakeholders and by third-class mail to nearby residents; prepare agendas, sign-in sheets, comment sheets, signage, and other print materials; facilitate meeting proceedings; venue coordination, prepare exhibits and a PowerPoint presentation for each meeting to illustrate concepts and plan elements; record public comments/assist with appropriate responses; and prepare a detailed meeting report. Following the meeting, Siegfried will develop a summary of the meeting which will include all feedback received and photographs of the meeting. The first meeting will be scheduled after the 50% plans and Fremont parking study have been prepared. The second meeting will be prior to the bid documents being released.

Task 5 | Coordination/Meetings

Siegfried will attend a design kick-off meeting and other subsequent meetings with the City (in-person or virtual), as needed, to finalize the design. Our team will attend a pre-construction meeting, a post construction meeting, and meet and assist staff during construction as required. We will prepare and provide a comprehensive work schedule to reflect the timeframe for each task of the proposed scope of work, utilizing Microsoft Project. The project schedule will show the tasks, duration, milestones, assignments, critical paths, successors, predecessors, and other relevant data. The project schedule will be maintained and updated monthly throughout the duration of the PS&E phase of the project. An updated project schedule will be submitted after each submittal review.

Task 6 | Design Support During Construction

As part of the proposal, Siegfried will include bid support services that consist of assisting the City in addressing inquiries submitted during bidding and design support during construction phase of the project. We will include services for design support during construction which include responding to RFIs, submittal reviews and approvals, assist City staff in reviewing Contract Change Orders, attend construction and field meetings if necessary, assist the City Inspector with specific design-related issues during construction and any needed consultation with the construction contractor and/or the City Project Manager/Resident Engineer throughout construction.

Task 7 | As-built Drawings

Siegfried will prepare as built drawings upon receipt of red-lines from the contractor, as well as provide electronic copies of the As-built sheets. As-built record drawings will reflect change orders, accommodations, and adjustments to all improvements constructed. Prior to accepting the As-built Plans, City staff will review the Record Drawings and electronic files to confirm that they reflect what has been constructed. Electronic files of the As-built drawings (PDF format) and CAD (DWG or DXF format) will be provided in addition to the original As-Built Mylars. Changes will be reflected on the mylars either by hand or on a new printed sheet.

The City of Stockton, its officers, officials, employees, and volunteers are to be covered as additional insureds on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts, or equipment furnished in connection with such work or operations. General liability coverage can be provided in the form of an endorsement to the Contractor's insurance (at least as broad as ISO Form CG 20 10 11 85 or if not available, through the addition of **both** CG 20 10, CG 20 26, CG 20 33, or CG 20 38; **and** CG 20 37 if a later edition is used). This form of insurance will be acceptable provided that all of the Primary and Umbrella or Excess Policies shall provide all of the insurance coverages herein required, including, but not limited to, primary and non-contributory, additional insured, Self-Insured Retentions (SIRs), indemnity, and defense requirements. The Umbrella or Excess policies shall be provided on a true "following form" or broader coverage basis, with coverage at least as broad as provided on the underlying Commercial General Liability insurance. No insurance policies maintained by the Additional Insureds, whether primary or excess, and which also apply to a loss covered hereunder, shall be called upon to contribute to a loss until the Contractor's primary and excess liability policies are exhausted.

Notice of Cancellation

Each insurance policy required above shall provide that coverage shall not be canceled, except with notice to the City of Stockton.

Waiver of Subrogation

Contractor hereby grants to City of Stockton a waiver of any right to subrogation which any insurer of said Contractor may acquire against the City of Stockton by virtue of the payment of any loss under such insurance. Contractor agrees to obtain any endorsement that may be necessary to affect this waiver of subrogation, but this provision applies regardless of whether or not the City of Stockton has received a waiver of subrogation endorsement from the insurer.

Self-Insured Retentions

Self-insured retentions must be declared to and approved by the City of Stockton. The City of Stockton may require the Contractor to purchase coverage with a lower retention or provide proof of ability to pay losses and related investigations, claim administration, and defense expenses within the retention. The policy language shall provide, or be endorsed to provide, that the self-insured retention may be satisfied by either the named insured or City of Stockton. The CGL and any policies, including Excess liability policies, may not be subject to a self-insured retention (SIR) or deductible that exceeds \$25,000 unless approved in writing by City of Stockton. Any and all deductibles and SIRs shall be the sole responsibility of Contractor or subcontractor who procured such insurance and shall not apply to the Indemnified Additional Insured Parties. City of Stockton may deduct from any amounts otherwise due Contractor to fund the SIR/deductible. Policies shall NOT contain any self-insured retention (SIR) provision that limits the satisfaction of the SIR to the Named. The policy must also provide that Defense costs, including the Allocated Loss Adjustment Expenses, will satisfy the SIR or deductible. City of Stockton reserves the right to obtain a copy of any policies and endorsements for verification.

All certificates and endorsements and copies of the Declarations & Endorsements pages are to be received and approved by the City of Stockton before work commences. However, failure to obtain the required documents prior to the work beginning shall not waive the Contractor's obligation to provide them. The City of Stockton reserves the right to require complete, certified copies of all required insurance policies, including endorsements required by these specifications, at any time. City of Stockton reserves the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other special circumstances.
