4. Detailed Work Plan

This section details our approach to executing the project scope of work. The detailed work plan is based on Kimley-Horn's preliminary field investigations, our understanding of the goals and objectives of the project, and our interpretation of the tasks outlined in the RFP.

TASK 1: COORDINATION/MEETINGS

For this task, the coordination and meeting activities for this project will include the following:

- Attend project kick-off meeting, and prepare meeting agenda and minutes.
- Arrange and attend office and field meetings with the City to discuss and present the proposed designs and review design plan comments.
- Submit the 65% and 95% plans to private utility companies to identify potential conflicts and coordinate adjustments or relocations.
- Prepare and complete monthly updates to the project schedule in Microsoft Project format.
- Prepare up to six (6) monthly progress reports, schedule updates and invoices, and participate in monthly conference calls with City staff to discuss current action items and schedule based on completion of project design within 90 days from receipt of notice to proceed.
- Attend meetings or the submittal of plans and grant compliance documents in addition to those described above, to coordinate utility service and adjustments, and for obtaining authorization to construct the improvements. Any necessary modifications to the final design requested by the utility company will be provided upon written authorization from the City and for an additional fee to be agreed upon prior to starting work.

TASK 2: DATA COLLECTION/BACKGROUND RESEARCH

Background research will include the review of readily available relevant project documents and design standards; compiling public utility system maps, as-built traffic signal plans, BRT IV project design plans, and details for use in project design; and submission of utility information request letters to privately-owned utility companies with facilities in the public right-of-way that may be affected by this project.

Kimley-Horn will collect two-hour weekday turning movement volumes at each of the project intersections during the morning, midday, and evening peak periods at each of the project intersections, as well as average daily traffic (ADT) volumes at one location on the corridor. The ADTs will cover at least one weekend day. Additionally, we will conduct an extra two-hour turning movement count at Grant Street to capture traffic volumes associated with the main weekly service at the Sikh Temple along Grant Street, south of MLK Boulevard. The day and time of the special two-hour count will be determined in consultation with the City.

Kimley-Horn will conduct field reviews during the data gathering phase. We will verify utility as-builts and intersection record drawing information provided by the City and utility companies. Kimley-Horn will walk the entire project corridor to observe existing traffic conditions, pedestrian conditions, assess existing lane configurations, signal phasing, posted speed limits, existing bus stops and routes, and visible utilities (above and below ground), as well as ADA curb ramp and roadway pavement conditions.

We will check existing vehicle detection including stopline, advance, and system detection loops to verify that they are operational and in correct working order. We will document the loop installation needs at each intersection.

Since we already have much of this information from our design on the BRT IV project, we will only need to collect additional information that we don't already have. This will result in a shorter timeline for this task.

The photo log will be submitted on a CD to City staff.

Task 2 Deliverables

- Photo log of project intersections
- Copies of Utility Request Letters
- Traffic count data

TASK 3: TRAFFIC ANALYSIS

Kimley-Horn will use the traffic count data collected in Task 2 to develop a Synchro model for the project intersections for each peak period (AM, midday, PM). We will analyze and compare existing traffic signal phasing and lane geometries against proposed scenarios including protected left-turn phasing and dedicated left-turn lanes on certain approaches.

After the analysis is complete, Kimley-Horn will prepare recommendations for traffic signal phasing and lane geometries at the project intersections and submit to the City. The recommendations will include the inclusion of protected left-turn phasing and the storage lengths for the left-turn lanes. We will assess different signal phasing alternatives including, but not limited to:

- Five-phase operations (dual entry phasing on the side streets)
- Full eight-phase operations
- Split phasing along the side streets (with removal of a crosswalk)

Following confirmation of the final traffic signal phasing and lane geometries, Kimley-Horn will develop the proposed coordination plans to be implemented post-construction.

Task 3 Deliverables

- Draft/Final Traffic Signal Phasing and Lane Geometry Recommendations Memorandum

TASK 4: PLANS, SPECIFICATIONS, AND ESTIMATE

Kimley-Horn will prepare 65%, 95%, and Final (signed and sealed) plans, specifications, and engineer's estimates.

Prior to the development of the 65% PS&E documents, our first step will be to prepared recommendations on the curb ramp types for each of the intersection corners. We will set up the intersection base plans by combining our plans from the BRT IV design with the new information we have collected (i.e., field work, survey data, etc.) for this project.

Topographic Survey

Prior to the start of detailed design, we will complete a topographic survey at all three intersections. The survey will cover the curb ramps, gutter, and sidewalk for approximately several hundred feet in each direction on all four corners of the project intersections. The survey will also capture locations of all above-ground utilities, including overhead utilities. Clearance to overhead utilities will be included with the topographic survey data.

The detailed survey will include all four corners of each project intersection. The survey limits for each intersection corner will be 400 feet along the sidewalk beyond beginning of curb return to 400 feet along sidewalk beyond end of curb return. Cross sections will be taken at five feet beyond beginning of curb return, beginning of curb return, 1/3 of curb return, 1/2 of curb return, 3/4 of curb return, end of curb return, and five feet beyond curb return. Cross sections will include elevations for the following: five feet from the back of sidewalk (where possible), back of sidewalk, intermediate sidewalk grade breaks, top and bottom of curb ramps, top of curb, gutter flow line, lip of gutter, roadway pavements at five feet and 10 feet and 20 feet from the face of curb. Survey will also provide pavement grades adjacent to each crosswalk ramp, for verifying ADA compliance.

Invert elevations of accessible storm drain manholes, sanitary sewer manholes, and curb inlets will be provided, along with the horizontal location and measured height above ground level of any overhead utility lines.

Survey control will tie into the City's listed survey monuments. The survey will provide right-of-way and easements based on County records and tied to the City's Horizontal and Vertical System.

ADA Curb Ramp Recommendations

Using the topographic survey data, and the City's standard curb ramp and Type 2 catch basin standard details as a basis, Kimley-Horn will analyze the feasibility of installing dual curb ramps at each corner of the project intersections. The results of the feasibility analysis, and the recommended curb ramp layouts, will be detailed in a Technical Memorandum that will be submitted to the City for review. The technical memorandum will be prepared for the project file documenting the curb ramp recommendations.

- Technical Memorandum (curb ramp recommendations)

Task 4.2: 65% Plans, Specifications, and Cost Estimate

Based on the feedback received from the City on the Technical Memorandum, our team will proceed with creating 65% PS&E. The plans will be drafted and will show the traffic signals, horizontal and vertical design of curb ramps, and signing/stripping elements. Traffic Signal Modification plans will include layout representations in plan view (at a drawing scale of 1" = 20'). The design will show proposed elements such as new traffic signal pole and mast arm placement, and conduit routing. New curb and sidewalk will be shown, and pavement conform limits will be designed. Kimley-Horn will complete the design in AutoCAD Civil 3D format and will adhere to applicable City design standards and requirements. We will use standard City plan sheet borders, title blocks, and general notes provided to us. Utility information will be shown in the plans.

The design details to be prepared at the 65% design level include the following:

- Title Sheet
- General notes, abbreviations, and legend sheet [1 sheet]
- Standard Details [5 sheets]
- Civil Design Plans and Details [3 sheets]
- Traffic Signal Modification Plan and Conductor Schedules [6 sheets]
- Signing and Stripping Plan [3 sheets]
- Stage Construction Plan [4 sheets]

For the 65% technical specifications submittal, we will prepare technical specification based on the City's base specifications. The 65% specifications will include details specific to the 65% design.

A 65% engineer's estimate will be prepared and will include costs for the elements shown in the design. The engineer's estimate will be prepared in Microsoft Excel format, and will be based on construction costs that we've seen for recent projects of similar size and scope.

Task 4.2 Deliverables

- 65% Plans (24" x 36") – 6 sets
- 65% Technical Specifications – 6 sets
- 65% Engineer's Estimate – 6 sets

Task 4.3: 95% Plans, Specifications, and Cost Estimate

Kimley-Horn will prepare a comment resolution matrix summarizing the comments received on the 65% PS&E documents and the resolutions for each comment. This matrix will be submitted with the 95% PS&E

documents, along with original red-lined mark-ups of the 65% PS&E documents. Based on the review comments on 65% PS&E, the approved version of the 65% PS&E will be advanced to the 95% completion level.

Kimley-Horn will develop the 95% technical specifications to include specific provisions regarding construction requirements, materials, and compensation. The applicable City standard details will be provided in an appendix to the special provisions. We will update the engineer's estimate based on the revised 95% design.

Kimley-Horn will prepare the technical elements of the construction RFA package, and submit to the City for review.

Task 4.3 Deliverables

- 65% Design Comment Resolution Matrix
- 65% Design Redline Markup
- 95% Plans (24" x 36") – 6 sets
- 95% Technical Specifications – 6 sets
- 95% Engineer's Estimate – 6 sets
- Construction RFA Package

Task 4.4: Final (and 100% Check Print) Plans, Specifications, and Cost Estimate

Upon completion of the 95% design review, Kimley-Horn will organize a design review meeting to discuss comments. Kimley-Horn will prepare a comment resolution matrix which will summarize the comments received on the 95% PS&E documents and the resolutions for each comment. This matrix will be submitted with the draft 100% PS&E documents, along with the original red-lined mark-ups of the 95% PS&E documents.

Based on the review comments on 95% PS&E, the approved version of the 95% PS&E will be advanced to the draft 100% completion level. Kimley-Horn will submit the draft 100% PS&E to the City for a final plan check review. It is anticipated that any comments resulting from the plan check will be editorial in nature and will be communicated via e-mail or discussed on a conference call. Any significant revisions to the design after submittal of the draft 100% PS&E will be considered as additional services to be completed for an additional fee upon receipt of written authorization from the City. A total of one additional design meeting is included after the submittal of the draft 100% PS&E documents.

Final PS&E will be prepared following completion of the City's plan check review. The final full-sized (24" x 36") hard copy plans will be wet-signed by the professional engineer in responsible charge. The Final PS&E will be submitted to the City for use in advertising and constructing the project. One digital file of each of the plans, specifications, and estimate, on CD will be submitted to the City for record. The digital file for Final plans specifications and estimate will be in AutoCAD Civil 3D, Microsoft Word, and Microsoft Excel format, respectively.

Task 4.4 Deliverables

- 95% Design Comment Resolution Matrix
- 95% Design Redline Markup
- 100% Check Print Design Plans (24" x 36") – 6 sets
- Final Plans, Mylar (24" x 36")
- Final Technical Specifications and Engineer's Estimate

TASK 5: ENVIRONMENTAL SERVICES

Kimley-Horn's environmental services team proposes to prepare an ISA (Phase 1), and write the CEQA Categorical Exemption. We assume that the City or other consultants are taking care of the required air quality and biological technical memorandums required by the PES.

Task 5.1: Initial Site Assessment

The Kimley-Horn team will prepare and submit the Hazardous Waste ISA report per Caltrans requirements, to identify existing or potential environmental contamination.

The intention of the ISA will be to identify potential issues that may impact the Project with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601) and petroleum products. Exceptions in the Phase I standard include: 1) no title searches or property appraisals will be performed for the subject property and vicinity, and 2) no direct interviews of the owners of the subject parcels will be performed.

The Kimley-Horn team will perform the ISA and summarize the results in a report. We will incorporate the comments received on the draft report from the City and prepare the final ISA report.

Our team has assumed that no soil sampling or testing will be performed. Any testing, as required by Caltrans, would also be an additional service.

Task 5.1 Deliverables

- Draft/Final Initial Site Assessment Report

Task 5.2: CEQA Documentation

The Kimley-Horn team will prepare necessary documents to obtain a Categorical Exemption under the California Environmental Quality Act (CEQA).

Task 5.2 Deliverables

- Documentation for CEQA determination

project manager to conform to the audit or review recommendations. For contracts over \$3,500,000, the following section applies:

- E. Consultant Cost Proposal is subject to a CPA ICR Audit Work Paper Review by Caltrans' Audit and Investigation (Caltrans). Caltrans, at its sole discretion, may review and/or audit and approve the CPA ICR documentation. The Cost Proposal shall be adjusted by the Consultant and approved by the City Contract Administrator to conform to the Work Paper Review recommendations included in the management letter or audit recommendations included in the audit report. -
2. If Caltrans is unable to issue a cognizant letter per paragraph E.1. above, Caltrans may require Consultant to submit a revised independent CPA-audited ICR and audit report within three (3) months of the effective date of the management letter. Caltrans will then have up to six (6) months to review the Consultant's and/or the independent CPA's revisions.
 3. If the Consultant fails to comply with the provisions of this Section E, or if Caltrans is still unable to issue a cognizant approval letter after the revised independent CPA-audited ICR is submitted, overhead cost reimbursement will be limited to the provisional ICR that was established upon initial rejection of the ICR and set forth in paragraph E.1. above for all rendered services. In this event, this provisional ICR will become the actual and final ICR for reimbursement purposes under this contract.
 4. Consultant may submit to City final invoice only when all of the following items have occurred: (1) Caltrans approves or rejects the original or revised independent CPA-audited ICR; (2) all work under this contract has been completed to the satisfaction of City; and, (3) Caltrans has issued its final ICR review letter. The Consultant **MUST SUBMIT ITS FINAL INVOICE TO City** no later than 60 days after occurrence of the last of these items.

The provisional ICR will apply to this contract and all other contracts executed between City and the Consultant, either as a prime or subconsultant, with the same fiscal period ICR.

ARTICLE X SUBCONTRACTING

- A. Nothing contained in this contract or otherwise, shall create any contractual relation between City and any subconsultant(s), and no subcontract shall relieve Consultant of its responsibilities and obligations hereunder. Consultant agrees to be as fully responsible to City for the acts and omissions of its subconsultant(s) and of persons either directly or indirectly employed by any of them as it is for the acts and omissions of persons directly employed by Consultant. Consultant's obligation to pay its subconsultant(s) is an independent obligation from City's obligation to make payments to the Consultant.
- B.
