Glossary

- **Accrued Interest:** Interest that is due on a bond or other fixed income security since the last interest payment was made.
- **Agencies:** Federal agency securities and/or Government-sponsored enterprises.
- **Amortized Cost:** The original cost of the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discount or premium with respect to short-term securities (those with less than one year to maturity at time of issuance) is amortized on a straight line basis. Such discount or premium with respect to longer-term securities is amortized using the constant yield basis.
- **Asset-Backed Security:** A financial instrument collateralized by an underlying pool of assets – usually ones that generate a cash flow from debt, such as loans, leases, credit card balances, and receivables.
- **Bankers' Acceptance:** A draft or bill of exchange accepted by a bank or trust company. The accepting institution guarantees payment of the bill as well as the insurer.
- **Commercial Paper:** An unsecured obligation issued by a corporation or bank to finance its short-term credit needs, such as accounts receivable and inventory.
- **Contribution to Total Return:** The weight of each individual security multiplied by its return, then summed for each sector to determine how much each sector added or subtracted from the overall portfolio performance.
- **Effective Duration:** A measure of the sensitivity of a security's price to a change in interest rates, stated in years.
- **Effective Yield:** The total yield an investor receives in relation to the nominal yield or coupon of a bond. Effective yield takes into account the power of compounding on investment returns, while nominal yield does not.
- **FDIC:** Federal Deposit Insurance Corporation. A federal agency that insures bank deposits to a specified amount.
- **Interest Rate:** Interest per year divided by principal amount and expressed as a percentage.
- **Market Value:** The value that would be received or paid for an investment in an orderly transaction between market participants at the measurement date.

Section 1 | Economic Update

Economic Update

- Recent economic data has shown above trend growth fueled by a rise in consumer spending and a continuing healthy US job market. Inflationary trends are subsiding, but core levels remain above the Fed's target. Given the cumulative effects of restrictive monetary policy and tighter financial conditions, we believe the economy will gradually soften and the Fed will loosen monetary policy in 2024.
- As expected at the January meeting, the Federal Open Market Committee voted unanimously to leave the Federal Funds rate unchanged at a target range of 5.25 - 5.50%. Fed Chair Powell signaled that the federal funds rate is likely at or near its peak, but discounted market expectations of a rate cut in March. We believe the FOMC will loosen monetary policy in mid-2024 as inflation and economic growth continue to moderate.
- US Treasury rates declined minimally in the front-end of the yield curve in January. The 2-year Treasury yield declined 4 basis points to 4.21%, the 5-year Treasury yield dropped 1 basis point to 3.84%, and the 10-year Treasury yield decreased 3 basis points to 3.91%. The inversion between the 2-year Treasury yield and 10-year Treasury yield narrowed to -30 basis points at January month-end versus -37 basis points at December month-end. The spread between the 2-year Treasury and 10-year Treasury yield one year ago was -69 basis points. The inversion between 3-month and 10-year Treasuries remained at -146 basis points in January from December. Interest rates peaked in the third quarter of 2023 prior to Fed Chair Powell's dovish remarks late in the year, which resulted in a decline in yields across the curve. The Fed signaled a shift towards less restrictive monetary policy in 2024. The shape of the yield curve indicates that the probability of recession persists.

Employment

The U.S. economy added 353,000 jobs in January, vastly exceeding consensus expectations of 185,000, and upwardly revised 333,000 jobs in December. Leading sectors included professional and business services, health care, retail trade, and social assistance. The trajectory of job creation has increased, with the three-month moving average payrolls at 289,000 and the six-month moving average at 248,000. The unemployment rate remained unchanged at 3.7% for the third month, and the labor participation rate was unchanged at 62.5%, remaining below the pre-pandemic level of 63.3%. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons rose to 7.2% from 7.1% last month. Average hourly earnings rose 4.5% year-over-year in January, increasing from an upwardly revised 4.3% gain last month. Employment remains strong by historical standards.

Job Openings & Labor Turnover Survey

Job Openings

Source: US Department of Labor

The Labor Department's Job Openings and Labor Turnover Survey (JOLTS) increased to 9.03 million in December, compared to an upwardly revised 8.92 million in November. While on a downward trend, job openings still represent a healthy ratio of around 1.44 jobs for each unemployed individual. The quits rate remained at 2.2%, hovering around pre-pandemic levels, down from its high of 3.0% in mid-2022 when labor demand far outstripped supply. While the current level of job openings remains elevated from a historical perspective, the trend is decelerating.

Inflation

Consumer Price Index (CPI)

Personal Consumption Expenditures (PCE)

Source: US Department of Commerce

The Consumer Price Index (CPI) increased 0.3% month-over-month and 3.4% year-over-year in December, increasing from 3.1% year-over-year in November. The Core CPI, which excludes volatile food and energy components, was up 0.3% month-over-month and 3.9% year-over-year, down from November. Shelter costs remain elevated, contributing to more than half of the overall increase while motor-vehicle insurance costs jumped by over 20%, the most since 1976. The Personal Consumption Expenditures (PCE) Index headline inflation increased 0.2% month-over-month and rose 2.6% year-over-year in line with November. Core PCE, the Federal Reserve's preferred inflation gauge, increased 0.2% month-over-month and continued its deceleration to 2.9% year-over-year in December from a 3.2% year-over-year in November. The trend is moderating, but inflation remains above the Fed's 2% target.

Retail Sales accelerated to 0.6% in December after an unrevised +0.3% in November, exceeding the +0.4% consensus forecast. On a year-over-year basis, Retail Sales growth increased to 5.6% in December from 4.0% in November due to notable gains in categories like food and drinking places, clothing, general merchandise stores, and e-commerce. The Conference Board's Consumer Confidence Index surged to a two-year high of 114.8 in January from 108.0 in December on surging views of current conditions and declining pessimism about the future. The increase in confidence points to slower inflation, anticipation of lower interest rates, and generally favorable employment conditions. While the consumer has been resilient, dwindling excess savings, rising credit card balances, and the resumption of student loan payments pose potential headwinds to future economic growth.

Leading Indicators of Economic Activity

Leading Economic Indicators (LEI)

Chicago Fed National Activity Index (CFNAI)

The Conference Board's Leading Economic Index (LEI) fell 0.1% in December, marking the twenty-first consecutive month-over-month decline. The index dropped 6.9% year-over-year. Although the magnitude of the monthly declines has lessened, the Conference Board continues to view the underlying weakness as signaling the risk of recession persists. The Chicago Fed National Activity Index (CFNAI) declined to -0.15 in December from a downwardly revised +0.01 in November. On a 3-month moving average basis, the CFNAI declined to -0.28 in December from -0.24 in November, indicating a rate of growth below the historical average trend.

Housing Starts decreased month-over-month in December by 4.3% to an annual rate of 1.460 million units. Starts for single-family homes were down 8.6%, while multi-family homes rose 7.5%. Total starts of new homes are up 15.8% year-over-year. Although single family home starts decreased in December, the National Association of Home Builders Market Index increased faster than expectations due to lower mortgage rates providing a boost in confidence for homebuilders. According to Freddie Mac, average 30-year fixed rate mortgage rates declined to 6.63% as of February 1st. According to the Case-Shiller 20-City Home Price Index, housing prices rose 5.40% year-over-year in November, accelerating from a 4.88% year-over-year gain in October. Tight inventories and higher mortgage rates continue to impact affordability.

Survey Based Measures

The Institute for Supply Management (ISM) Manufacturing index moved higher to 49.1 in January from 47.1 in December as demand moderately improved, while output remained stable. However, this marks the 15th consecutive month of contraction in factory activity below a reading of 50. The ISM Services Index rebounded to 53.4 in January from 50.6 in December due to steady business conditions across the sector. Respondents are optimistic about the economy due to the potential impact of interest rate cuts; however, they are cautious due to inflation, associated cost pressures and ongoing geopolitical conflicts.

According to the advance estimate, fourth quarter GDP increased at an annualized rate of 3.3%, down from 4.9% in the third quarter. The headline growth was led by consumer and government spending. The consensus estimate calls for 2.3% growth in the first quarter and 1.5% growth for the full year 2024.

Federal Reserve

Federal Reserve Balance Sheet Assets

Effective Federal Funds Rate

As expected at the January meeting, the Federal Open Market Committee voted unanimously to leave the federal funds rate unchanged at a target range of 5.25-5.50%. The Fed assesses the progress to achieving its employment and inflation goals are moving into better balance, yet changes to monetary policy remain data dependent. The Committee does not expect it will be appropriate to reduce the target range until it has gained greater confidence that inflation is moving sustainably toward 2 percent. However, Fed Chair Powell signaled that the federal funds rate is likely at or near its peak. The futures market is pricing in 5 rate cuts in 2024. We believe the FOMC will loosen monetary policy in mid-2024 as inflation and economic growth continue to moderate. Since the Fed began its Quantitative Tightening campaign in June 2022, securities holdings have declined by over \$1.3T to approximately \$7.6T.

The inversion between the 2-year Treasury yield and 10-year Treasury yield narrowed to -30 basis points at January month-end versus -37 basis points at December month-end. The average historical spread (since 2003) is about +130 basis points. The inversion between 3-month and 10-year Treasuries was unchanged at -146 basis points in January from December. The shape of the yield curve indicates that the probability of recession persists.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc ("IDS"), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.

Your qualified custodian bank maintains control of all assets reflected in this statement and we urge you to compare this statement to the one you receive from your qualified custodian. Chandler does not have any authority to withdraw or deposit funds from/to the custodian account.
