

Resolution No.

# STOCKTON CITY COUNCIL

---

## RESOLUTION APPROVING TO DESIGNATE ADDITIONAL STOP CONTROLLED INTERSECTIONS

The City of Stockton installs stop controls to assign right-of-way and help promote orderly traffic flow; and

In accordance with the Stockton Municipal Code, stop sign installation is authorized by Council resolution either by designation of through streets, or by designation of intersections where stop signs are warranted; and

These authorized locations are recorded on either the "Through Street Schedule" or the "Stop Controlled Intersection Schedule" that are maintained by the Public Works Department; and

The conversion of the existing yield sign controls to stop sign controls on the eastbound and westbound approaches of Admiral Drive at Bainbridge Place, and on the northbound and southbound approaches of Iris Avenue at Kiltie Way will upgrade the traffic control at these intersections to improve traffic operating conditions, reduce conflicts, and establish uniformity of traffic control devices with surrounding intersections; and

Based on sight distance restrictions, prevailing traffic operating conditions, and reported collision history, installation of 4-way stop control is the appropriate action to improve traffic control and reduce conflicts at Weber Avenue/Aurora Street and Weber Avenue/Grant Street; now, therefore,

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF STOCKTON, AS FOLLOWS:

1. The City Council authorizes an amendment to the "STOP CONTROLLED INTERSECTION SCHEDULE" adopted by Resolution No. 85-0065 on January 28, 1985, as follows:
