A - Meetings

Kick-Off Meeting: The KSN Team will attend a Kick-Off Meeting with City Staff and key project stakeholders. The purpose of the meeting will be, 1) to review and refine the project scope, goals, and expectations, 2) to define the lines of communication between KSN, City staff, utility companies and other project stakeholders, 3) to establish project standards, procedures and formats; 4) to identify project constraints and opportunities, 5) to review the project schedule, and 6) to discuss available as-built documents and other pertinent existing background information related to the project. The City of Stockton will coordinate the date, time and location of the Kick-Off Meeting. KSN will prepare and distribute the agenda and the minutes for the Kick-Off Meeting.

Meetings w/City Staff: KSN will hold regularly scheduled teleconference meetings, (maximum 4), to discuss project progress and schedule, and to clarify project design issues and City standards. KSN will prepare and distribute agendas and minutes for each meeting.

Site Visits and Miscellaneous Meetings w/ City Staff: KSN will attend up to 4 project status meetings to be held in Stockton, to discuss project progress and schedule, and to clarify project design goals and issues. KSN will prepare and distribute the agendas and minutes for each meeting.

B - Design Schedule

KSN will prepare a project schedule, with the City's input, at the outset of the project. The schedule will be updated monthly and KSN will include a schedule status update with each monthly billing. The schedule and billings will be submitted in the form and in sufficient detail to track the project status and contract expenditures as outlined by the City at the beginning of the project. The project schedule will be prepared using Microsoft Project 2013.

Deliverables:

- Meeting agenda and minutes.
- Monthly project schedule updates.

TASK NO. 2 - UTILITY RESEARCH AND COORDINATION

KSN will perform utility research, mapping, and coordination within the project limits along the March Lane/East Bay MUD Bicycle and Pedestrian Path based on the following:

A - Identify Utility Providers

KSN will prepare a list of potentially impacted utilities using: 1) the City of Stockton and San Joaquin County standard utility contact list; 2) the list of utility subscribers to the local Underground Service Alert (USA) service; 3) the list of local utility providers that KSN has assembled over the years; and 4) the utility contact information posted on existing facilities in the vicinity of the project.

B - Utility Request Letter (A Letter)

On receipt of the Notice to Proceed, KSN will send out the Utility Request Letter to the utility companies. The Utility Request Letters will provide a description of the proposed project scope and limits, and will formally request as-built documents and verification of the nature and location of existing utility facilities within the project limits. The documentation received from the utility companies will be field reviewed and verified. If necessary, follow-up communications with the utility companies will be made to clarify the size, type and extent of the existing facilities. KSN will compile the existing utility information onto an electronic "existing utilities" drawing file tied to the project horizontal control and referenced to the project base mapping.

C - Conflict Letter (B Letter)

Subsequent to the submittal of the 65% complete project documents, KSN will send out the Conflict Letter to the utility companies. The Conflict Letter will be accompanied with a copy of the 65% project plans that will depict the locations of conflict with the new improvements. The letter will formally request the utility company to field verify the conflict and provide a schedule for the relocation of the facility in conflict. If necessary, follow-up communications with the utility companies, including field meetings and/or field surveys to locate "pothole" information provided by the utility company, will be made to clarify the conflict and/or the relocation alignment of the existing facility. KSN will incorporate the utility relocation information onto the electronic "existing utilities" drawing file described above.

D - Final Project Plans Letter (C Letter)

Subsequent to the submittal of the completed project documents (bid set), KSN will send a set of the final project plans to each affected utility company. The letter accompanying the plans will inform the utility company of the project bid date, the approximate date construction will begin, and the approximate date construction will be completed.

KSN will maintain a utility contact summary sheet that will include pertinent information for each utility such as the contact person, address and telephone numbers, description of the utility's facilities, dates that the Utility Letters described above are sent, a summary of each utility's response to the Utility Letters, etc.

Deliverables:

- Digital file of the existing utility mapping in an AutoCAD compatible format.
- Digital file copy of "A" Letter sent to each utility company in PDF compatible format.
- Digital file copy of "B" Letter sent to each utility company in PDF compatible format.
- Digital file copy of "C" Letter sent to each utility company in PDF compatible format.
- Digital file of the utility contact summary in Excel compatible format.

TASK NO. 3 - SURVEYING & MAPPING

KSN will perform field surveys to develop the base mapping for the project. The scope of services KSN proposes to provide is more specifically described as follows.

A - Control Network

Establish horizontal and vertical survey control for the project based on available published control monuments utilizing either GPS or conventional survey methods. Horizontal control will be provided based on the California Coordinate System of 1983, Zone 3, U.S. Foot units (CA83IIF), consistent with the the City of Stockton's horizontal survey control network. Vertical control will be referenced to the North American Vertical Datum of 1988 (NAVD 88) based on available published National Geodetic Survey (NGS) and/or City of Stockton benchmarks.

B - Field Surveys

Conventional field surveys will be performed to obtain a centerline profile along the trail alignment and to gather existing site data at road crossings and driveway openings. Detailed surveys are limited to ramps and transition locations at roads and driveway openings. Elevation data will be collected along the bicycle trail centerline (profile only), transitions to street intersections, and points of connections to existing surface features. Surface evidence of the existing utilities will be surveyed and include invert elevations of below grade utilities, etc. The information obtained by the field surveys will be incorporated into the project base mapping.

C - Topographic Mapping

Base mapping will be prepared at a scale of 1" = 20' with spot elevations and/or 1' contour intervals. KSN will prepare the base mapping at the stated mapping scale and contour interval showing visible surface features, contours and spot elevations within the mapping limits.

D - Corner Records

If boundary or right of way monuments are discovered during field surveys, they will be located, shown on the plans, and a pre-construction corner record will be filed with San Joaquin County. This scope of services estimates a maximum of 3 pre-construction corner records. Resetting of monuments and post-construction corner records are not included in this scope of services and should be considered during construction activities. Boundary/ right of way surveying and mapping services are not included in this scope.

Deliverables:

- Digital file of the topographic mapping in an AutoCAD compatible format.

TASK NO. 4 - BACKGROUND RESEARCH

A - Site Reconnaissance

The KSN team will visit the site to perform field reconnaissance of the project limits. The KSN team will use the information collected during this time to develop recommendations for bicycle and pedestrian improvements, including improvements to the trail hardscape, signage, storm drainage, wheelchair ramps, and other permanent features affected by this project. The KSN team will develop a set of preliminary design plans based on these recommendations, described in additional detail in Task No. 5.

Deliverables:

- Site photos.

B - Permits

The KSN team will identify required permits, prepare permit applications, and assist the City with the negotiation of permit conditions, as required. The City will pay all permit fees. The preliminary design plans will be used to develop any exhibits required for the permit applications.

Deliverables:

- Digital file of Permit Matrix in Excel compatible format.

TASK NO 5 – ENVIRONMENTAL SERVICES

Project Approach

The project will utilize federal funding (CMAQ program); therefore, environmental documentation pursuant to the National Environmental Policy Act (NEPA) is required, and the project will be processed through Caltrans' Local Assistance Program. Certain categories of projects are specifically called out in 23 CFR 771.117(c) as actions that would fall under a Categorical Exclusion (CE) pursuant to NEPA. NEPA CEs are generally actions that do not induce significant impacts related to planned growth or land use for the area; do not require the relocation of significant numbers of people; do not have a significant impact on any natural, cultural, recreational, historic or other resource; do not involve significant air, noise, or water quality impacts; do not have significant impacts on travel patterns; and do not otherwise, either individually or cumulatively, have any significant environmental effect. However, the City of Stockton has asked the proposal to anticipate a Phase 1 – Initial Site Assessment.

Based on the information provided, GPA assumes that the project will be categorically excluded under the provisions of NEPA. A Preliminary Environmental Study (PES) Form will be required to initiate the NEPA process with Caltrans, and certain technical studies may be required to support the NEPA CE determination, depending on the project design and Caltrans Local Assistance Staff requirements. All environmental documents that may be required for NEPA approval will be completed pursuant to Caltrans' Standard Environmental Reference (SER) and Local Assistance Procedures Manual (LAPM). GPA will coordinate any NEPA documentation review with the City and Caltrans for all. If any other technical studies are required, they can be provided under an additional scope of work as described in the "Optional Task" described below.

The project will also be subject to the requirements of the California Environmental Quality Act (CEQA), and the City of Stockton will be the CEQA Lead Agency. It is anticipated that the proposed project could qualify as Categorical Exempt from CEQA under CEQA Guidelines Section 15301: Existing Facilities.

A - Project Management

GPA believes environmental coordination in all phases of the project is critical to project delivery. GPA understands the importance of following the project schedule and meeting design milestones. GPA anticipates that coordination and project management will need to occur with the project engineers, City staff, and Caltrans in all phases of the project. GPA will maintain a clear line of communication with the project team and conduct regular status checks to ensure all environmental tasks are on schedule and within budget. GPA will prepare monthly progress reports that include the progress of each task, new and ongoing issues, proposed resolutions, and estimated impacts on the schedule. GPA will also maintain electronic copies of the complete environmental record, and will provide the City with a copy of the environmental record upon project completion. GPA has experience with projects with similar time constraints, and understands that consistent communication in all phases of the project will help ensure that all milestones will be achieved within the required schedule and budget.

B - Phase 1 – Initial Site Assessment

GPA will work closely with Crawford & Associates, Inc. (CAInc), which will perform the following tasks to provide an Initial Site Assessment (ISA) to evaluate the project site and adjacent properties for evidence of recognized environmental conditions (RECs) and/or potential RECs that may significantly impact the project.

- Review and discuss the project with the design team.
- Review available project documents and reports including; existing ISA/ESA reports for nearby projects, APN parcel maps, site geology and ground water data. We will review this information

for evidence of suspected or known contamination/hazardous materials issues (such as pesticide usage, railroad alignments, industrial parks, orchards, etc.).

- Conduct a limited site reconnaissance to observe current land use and indications of potential contamination at the site, and to view publicly accessible portions of the adjacent properties.
- Review owner representative provided information, if available, regarding past and present operations conducted on the property to assess the potential for RECs.
- Review historical aerial photographs, topographic maps, and soil maps of the site and surrounding properties for indications of site use and potential sources of contamination.
- Perform federal, state, and city records review for indications of the use, misuse, or storage of hazardous and/or potentially hazardous materials on or near the site. The federal, state, and city database search will be provided by a professional record check service.
- Based on the results of the database search, site review, land use and existing assessments, CAInc will determine the risk of potential hazardous materials within and adjacent to the project area.
- Prepare a report summarizing the findings of our review, site reconnaissance, property owner interviews, historical photograph evaluation, and regulatory records review. We will address identified potential contamination and hazardous material impacts to provide recommendations and determine additional investigation and analysis.

CAInc will submit a draft ISA Report for review and comment prior to the final report submittal.

The ISA will commence immediately after our notice to proceed and can be completed within five to eight weeks.

Deliverables:

- Draft and Final Initial Site Assessment (ISA).

C - Notice of Exemption/Categorical Exemption

It is assumed that the project would qualify as categorically exempt from CEQA under CEQA Guidelines Section 15301: Existing Facilities. GPA will prepare a Notice of Exemption (NOE) for City's use in documenting the categorical exemption after project approval. The NOE will include all required elements as required pursuant to CEQA Guidelines Section 15062, and will include supporting documentation demonstrating the project's compliance with the requirements of a CEQA CE. GPA assumes that City will file the NOE with the San Joaquin County Clerk's Office and pay applicable fees. GPA will file the NOE with the California State Clearinghouse.

Deliverables:

- One (1) electronic copy of the Notice of Exemption and supporting documentation for City's use in filing with the San Joaquin County Clerk's Office. One (1) electronic copy of the Notice of Exemption filed with the California State Clearinghouse.

D - Meetings

GPA's Project Manager will attend up to three project meetings for the project by telephone.

TASK NO. 6 - PLANS, SPECIFICATIONS & ESTIMATES (CONSTRUCTION DOCUMENTS)

The KSN team will compile existing data available from the City of Stockton, utility companies, etc. Such information may be in the form of hard copy documents, as-built plans, reports, GIS data, and studies.

A - Civil Engineering

KSN will perform and coordinate all design tasks required for the documentation of the proposed civil improvements, including but not limited to project control and geometrics; utility modifications; bike/pedestrian path improvements; accessibility improvements; erosion control; signage; striping; and traffic control.

Transitions to existing improvements and hard surfaces will be clearly defined with appropriate cross-sections and/or details.

During the design process discussions and decisions will need to take place to determine the specifics of the bike route from Palm Plaza Place to West Lane. Some of the options are: 1) the bike route remains on the sidewalk, 2) the bikes are directed to the travel way on March Lane, 3) striping modification to March Lane to accommodate a dedicated bike lane. Each of these options have benefits and detriments to the cyclist and pedestrian. These benefits and detriments will be discussed in meetings with City staff and a recommendation will be presented to City Staff. The design improvements described above will improve the condition of the bike/pedestrian path itself, improve accessibility of the path, and improve safety for those cyclists and pedestrians using the path.

B - Traffic Engineering

1. Flashing Beacon Design

Y&C will use the FHWA "Guide for Improving Pedestrian Safety at Uncontrolled Crossing Locations" to prepare analysis to determine the appropriate traffic control measure at the pedestrian trail crossings at Feather River Drive and DaVinci Drive. Y&C will submit the analysis with the layout of the recommended traffic control measures in the 40% submittal.

Based on the City's comments, Y&C will prepare PS&E for the solar-powered Rectangular Rapid Flashing Beacons (RRFB) at the pedestrian trail crossings at Feather River Drive and DaVinci Drive (assume solar-powered RRFB for the purpose of proposal).

2. Traffic Signal Modification

Y&C will obtain electronic base plan from KSN and prepare traffic signal modification plans, specifications, and cost estimate (PS&E) for the intersections of March Lane at the following streets:

- Venezia Blvd
- McGaw Street
- Tyrol Lane
- Precissi Lane
- Claremont Avenue
- Kentfield Road
- Palm Plaza Drive

The traffic signal modifications will be limited to replace existing pedestrian pushbuttons and pedestrian signal heads with accessible pedestrian signals (APS) and count-down pedestrian signal heads for the south crosswalks at these intersections needing improved safety for pedestrians and cyclists on the trail. No other signal modifications will be included. The signal plan will show the SE and SW corners of these intersections requiring modifications only and the proposed electrical work will be controlled by project notes. No signal equipment or conductor schedules will be included.

The Project will also add signage and striping to clearly notify cyclists and pedestrians that a stop is required at street crossings, as appropriate and in accordance with the current edition of the California MUTCD. These improvements will be located at the above mentioned intersections.

C - Landscape Architectural Design

JFGLA will provide design services for the design documentation of the replanting (if required) and irrigation repairs at the following four locations

- Venezia Blvd. at Median
- Tyrol Lane at back of ADA ramps
- St. Basil Greek Orthodox Church Driveway
- Between Georgetown Place and Pacific Avenue

JFGLA will visit the site, record information that affects the design concepts and transcribe the information onto the base mapping. JFGLA will design the layout of the hardscape features such as in-ground bicycle racks, pedestrian solar lighting, and way finding signage

D - Construction Documents

Improvement plans will be prepared on base sheets with the field survey data as a background, at a scale of 1"=20'. At this scale each sheet will cover one block of the project. Areas requiring greater detail will be prepared at an appropriate scale. The improvement plans will be prepared on a 24" by 36" sheet size with a print area that will permit half scale plans to be printed on 11" by 17" sheets.

The improvement plans are anticipated to include the following sheets:

Title Sheet
General Notes
Project Control Plan
Erosion Control Plans
Demolition Plans
Typical Cross-Sections and Miscellaneous Details
Layout Plans (plan/profile), including utility improvements
Signal Modification Plans
Flashing Beacon Plans
Irrigation plans
Landscape plans
Signage/Striping Plans

The improvement plans will be prepared in an Autodesk Civil 3D version 2018 compatible electronic format.

KSN will prepare the technical specifications and/or special provisions for the proposed improvements. These specifications will be incorporated with general conditions and the bid forms prepared by the design team. Specifications will be prepared in a Microsoft Word 2013 compatible electronic format.

KSN will prepare an engineer's estimate of construction cost for the proposed improvements. The spreadsheet will be prepared in a Microsoft Excel 2013 compatible electronic format.

E - QA/QC

KSN will implement quality assurance and quality control on all project deliverables and will review the project for constructability and bidability. Quality Assurance (QA) will be based on KSN's long-standing engineering procedures, document preparation standards, and file and document control methodologies. This QA process will be established at project initiation and implemented before delivering design documents to the City, they will be formally reviewed under a Quality Control process.

Deliverables:

- KSN will submit the construction documents for the project to the City for review and comment at the completion of Preliminary Design (40%), 65% completion, 95% completion, final design phase (100%) and bid documents.

Preliminary Design Submittal (40% Submittal): The Preliminary Design submittal will consist of memorandum describing the proposed improvements, which will include half scale photocopies (11"x17") of the plans, and an outline of the special provisions. At this submittal, the memorandum/plans will depict: the existing features; the basic geometrics and the schematic layout of the proposed improvements including each street intersection with proposed improvements needed to bring each intersection into current ADA compliance and the identification of potential conflicts with existing utilities and/or existing features. Six copies of the memorandum and plans will be submitted to the City for review and comment.

60% Submittal: The 60% submittal will consist of six sets (6) of half scale photocopies (11"x17") and one (1) of a full size set of the plans, specifications, and a preliminary engineer's estimate of construction costs will be submitted to the City for review and comment. This design submittal will include detailed plans of all the proposed improvements, documentation of construction details, detailed specifications, a preliminary construction cost estimate, and will incorporate comments from the preliminary design submittal along and a comment/response matrix of the previous submittal.

95% Submittal: The 95% submittal will consist of six sets (6) of half scale photocopies (11"x17") and one (1) of a full size set (24x36) of the plans, specifications, and an updated engineer's estimate of construction costs will be submitted to the City for review and comment. This design submittal will include detailed plans of all the proposed improvements, documentation of construction details, detailed specifications, a preliminary construction cost estimate, and will incorporate comments from the 60% design submittal along and a comment/response matrix of the previous submittal.

Final design, 100% Submittal: The Bid Documents will consist of six sets (6) of half scale photocopies (11"x17") and one (1) of a full size set (24x36) of the plans, specifications, and an updated engineer's estimate of construction costs. This submittal will include final construction details incorporating the City's comments from the 95% submittal along and a comment/response matrix of the previous submittal.

Bid Document Submittal: The Bid Documents will consist of one (1) reproducible mylar, full size set of improvement plans, one (1) reproducible set of specifications, and an updated engineer's estimate of construction costs. This Bid Documents will include final construction details incorporating the City's comments from the 100% submittal. A CD will be provided with the final improvement plans in an electronic file in AutoCad Civil 3D version 2018 compatible

format, the specifications in an electronic file in MS Word 2013 compatible format, and the engineer's estimate of construction costs in an electronic file in MS Excel 2013 compatible format.

The City of Stockton will distribute sets of each submittal package to the appropriate individuals in each City department having jurisdiction over the proposed improvements for review and comment. The City will consolidate comments from the departments, will resolve conflicting comments between City departments, and will provide KSN with one set of red line comments on the improvement plans and the specifications for the preliminary design, 60%, 95% and 100% submittals.

TASK NO. 7 – PUBLIC OUTREACH

The approach and public outreach work plan will be inclusive, detailed, and hands-on with plenty of opportunities for two-way communication between the project team members and members of the public. The scope will be implemented with care and sensitivity. An action plan is outlined below.

A - Stakeholder Database

JBC will research and develop a coded database of potentially interested parties, which will be updated throughout the project with names from the public meeting sign-ins; information from the project team; and from telephone, e-mail and personal contacts. The database will be coded according to interest and involvement with the project. Among the groups on the stakeholders list will be the following:

- Residents and property owners adjacent to the proposed project area
- Businesses and other establishments adjacent to the project area
- Elected and appointed officials and representatives of the City of Stockton, San Joaquin Council of Governments, Stockton Unified School District, and other pertinent governmental and quasi-governmental entities
- Groups representing businesses: Chambers of Commerce, Business Council, Inc., and others
- Civic, community, and environmental groups: Leadership Stockton, Stockton Bicycle Club, Audubon Society, Sierra Club, Stockton Beautiful and others
- Emergency responders
- Transit
- Utilities
- Pertinent City staff
- Other pertinent local, state and federal agencies

Deliverables:

- Coded database of stakeholders, updated frequently

B - Public Information Meeting

One public meeting will be held to present concepts and design features to neighboring residents and businesses and to the general public. The meeting will be held in a nearby facility. The meeting will be designed to provide information and to obtain feedback on the project features, design alternatives, and perceived impacts to adjacent properties and businesses.

JBC will schedule the meeting and make all meeting arrangements; as well as write, design, and issue meeting notices to the stakeholder database. The meeting notice will be reviewed by the City PIO prior to production and mailing. JBC will also prepare agendas, sign-in sheets, comment sheets, signage, and other print materials; facilitate meeting proceedings; assist with preparing exhibits to illustrate concepts and plan elements; provide refreshments; record public comments/assist with appropriate responses;

and prepare a detailed meeting report. JBC will also hand-deliver notices to the adjacent businesses. KSN will prepare a Power Point presentation and exhibits for the Public Information Meeting and will submit the City staff for review and acceptance.

JBC will compile all comments and recommendations for administrative and public review. JBC will also include Title VI reporting.

Preparation for the public meeting will include a "dry run" with the consultant and Public Works team. This dry run will review the information and format that will be presented at the upcoming public meeting.

Deliverables:

- Public information meeting (1).
- Dry run preparation meeting (1).
- Third-class mailed meeting notices to adjacent residents and businesses.
- First-class mailed meeting notices to others on the stakeholder list.
- Agendas, comment sheets, sign-in sheets, signage, record of public comments and responses, meeting summary, refreshments.
- Power Point and exhibits
- Title VI report.

C - Publicity/Advertising

JBC will provide public outreach sufficient to inform residents, adjacent businesses, and key stakeholders as follows: A public outreach plan will be prepared that will include a detailed, coded database of residents, property owners, adjacent businesses, public facilities, emergency responders, pertinent community groups, and other key stakeholders. Up to two newsletters will be prepared and distributed by U.S. Mail, one early in the project, one at start of construction, and others as needed. A webpage will be prepared for inclusion on the City website and, working with the City Public Information Officer, updated as information becomes available. Telephone and Internet hotlines will be staffed, documented, and records shared with the City and consultant project managers. JBC will also arrange for one-on-one meetings, if deemed necessary. Optional: public meeting.

Deliverables:

- Up to two newsletters will be prepared and distributed by U.S. Mail

TASK NO. 8 - PERFORMANCE OUTCOME

KSN will perform and provide to the City pre and post construction pedestrian and bicycle counts. The counting methodology described in the "National Bicycle and Pedestrian Documentation Project" utilized during the counting process. The dates and times will be submitted to the City for review and approval prior to counting. Preconstruction counts will be performed within 12 months of the beginning of construction and post construction counts shall be performed at least 6 months after project completion. KSN recommends an AM and PM count along the path near N. Pershing Avenue and N. El Dorado Street. Each counting session will be for a two hour period. The locations, dates, times and counting periods will be confirmed during the design process and submitted to the City for acceptance.

Deliverables:

- Counting methodology.
- Pre and post counting results for pedestrians and bicycles.

TASK NO. 9 – DESIGN SUPPORT DURING CONSTRUCTION

KSN will support the City's Construction Manager during the construction period by: providing letters of clarification during the bidding process for any design clarification necessary attending the construction phase meeting; reviewing submittals and approving as appropriate; consulting with the contractor to provide informal clarification; responding to design-related RFIs, and providing clarification as required; and preparing record drawings from redline plans provided to the City by the contractor.

Deliverables:

- Digital file of Record Drawings in an AutoCAD 2018 compatible format.
- Digital file of Record Specifications in a MS Word 2013 compatible format.

OPTIONAL SERVICES

Environmental

Optional Task 1 – Historic Property Survey Report and Archaeological Survey Report

It is anticipated that the project may qualify as a "Screened Undertaking" for purposes of compliance with Section 106 of the National Historic Preservation Act (Section 106), and documentation to address potential cultural resources in the project area would not be required. However, because the project may include ground-disturbing activities for installation of beacon footings and realignment of portions of the multi-use paths, Caltrans Local Assistance staff may elect not to consider the project a Screened Undertaking and may require preparation of documentation to address cultural resources, including archaeological resources. If cultural resources documentation is required, the GPA team will prepare a Historic Property Survey Report and an Archaeological Survey Report (HPSR/ASR) to address potential archaeological and cultural resources within the project area, and to comply with the requirements of Section 106.

Deliverables:

- Historic Property Survey Report and Archaeological Survey Report.

Optional Task 2 - Section 4(f) De Minimis Documentation

Section 4(f) of the Department of Transportation Act (49 United States Code [USC] 303) requires consideration of park and recreational lands, wildlife and waterfowl refuges, and historic sites in transportation project development. Caltrans may consider the existing bicycle trail to be recreational lands subject to Section 4(f), because it is a publicly-owned, publicly-accessible recreational facility. It is assumed that the project's "use" of any Section 4(f) lands would be considered a de minimis impact to the 4(f) resource, which is defined as a minimal impact to a Section 4(f) resource that is not considered to be adverse. To support a de minimis impact determination for the project, GPA will coordinate with Caltrans and provide required information, including:

- Applicability of Section 4(f) to each recreational property proposed to be used by the project;
- A description of the "use" of the Section 4(f) property;
- An explanation of why the "use" is de minimis;
- Records of public involvement;
- Any avoidance, minimization, and/or mitigation, measures required to reduce adverse effects from the conversion; and
- Written concurrence of the de minimis finding from official(s) with jurisdiction over the Section 4(f) property.

GPA would also coordinate with the City and Caltrans to complete required public noticing, which could include mailing of notices to interested parties, printing of a notice in the local newspaper, and/or posting of the notice on the City's website, the project area, and/or City Hall. It is anticipated that the public noticing period would be for a 30-day period.

Deliverables:

- Supporting information for a Section 4(f) de minimis finding to Caltrans. Public Notice template for City's use in completing public notification. Public Notice certified mailings to up to 5 parties.

Assumptions:

- GPA assumes that a de minimis finding would be the appropriate level of Section 4(f) determination for the project. If Caltrans finds that a different type of Section 4(f) finding is applicable to the project, the City would be notified immediately and GPA would need to re-scope the Section 4(f) documentation task. GPA assumes that direct mailings of public notices would be limited to no more than 5 parties. If additional mailings are required, GPA will charge \$5.00 for each additional mailing. GPA assumes that the City will be responsible for posting of the public notice at City Hall, at the project site, on the City's website, and in local newspapers.

Optional Task 3 - Biological Resources, Natural Environment Study (Minimal Impacts)

The project area is located within San Joaquin County, and is within boundaries of the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). The project area is largely developed and is surrounded by commercial and residential properties. The project area appears to be predominantly vegetated with landscaping, urban mature trees, and ruderal vegetation. To document the existing biological resources in the project area, identify potential project impacts, and develop appropriate impact avoidance, minimization, and mitigation measures, a Natural Environment Study (Minimal Impacts) (NES(MI)) will be prepared.

Optional Task 3a - Background Research and Biological Study Area Delineation

GPA will review available data on biological resources recorded on and within the vicinity of the project area, including all plant and wildlife species with the potential to be in the area. This review will include conducting searches in databases such as the California Natural Diversity Database (CNDDDB), National Wetlands Inventory, and the California Native Plant Society. Additionally, as required by Caltrans, a list of threatened and endangered species with the potential to be within the project area will be requested from the United States Fish and Wildlife Service (USFWS) and the National Marine Fisheries Service (NMFS). GPA will also work with the project team to delineate an appropriate Biological Study Area (BSA) that will cover the direct and indirect impact area for the project, including temporary construction areas, and create a BSA map to be used for the biological analysis.

Optional Task 3b - Field Surveys

GPA will systematically survey the BSA for plant and wildlife species, their signs, and/or potential habitat. GPA will work with the project team to limit the size of the survey area to the extent feasible, based on proposed construction areas. GPA will inventory botanical and wildlife resources observed in the BSA and will identify and record all existing vegetation communities in this area. Botanical surveys will be conducted during the appropriate blooming period for species with the potential to be in the project area (March-April), where feasible. Based on aerial investigations, waters of the United States

(U.S.) and waters of the state are not expected in the project area and therefore, a comprehensive jurisdictional delineation is not expected to be required.

As part of the development of this scope of work, GPA completed a preliminary CNDDDB search for special-status species recorded within the vicinity of the project area (Stockton West Quad and surrounding quads). The search identified several special-status species, including federally and/or state threatened, endangered, or candidate species, that have been recorded within the search area, including the giant garter snake (*Thamnophis gigas*), San Joaquin kit fox (*Vulpes macrotis mutica*), Swainson's hawk (*Buteo swainsoni*), and valley elderberry longhorn beetle (VELB) (*Desmocerus californicus dimorphus*), in addition to other special-status species.

Because the project is in a developed and heavily landscaped area with mature trees and is within the range of the San Joaquin kit fox, Swainson's hawk, and valley elderberry longhorn beetle, there may be habitat for these and other special-status species within and near the project area. GPA will confirm the existing habitat and potential for special-status species to be in the BSA during field surveys.

Optional Task 3c - Natural Environmental Study (Minimal Impact)

Following completion of the background research, BSA investigations, and field surveys, GPA will summarize the results of these studies into a Natural Environment Study (Minimal Impacts) (NES(MI)). The NES(MI) will include a discussion of the existing biological resources in the BSA, applicable regulations, potential project impacts, and proposed avoidance, minimization, and mitigation measures to minimize and/or mitigate these impacts to the extent feasible. If present, jurisdictional areas will be discussed in the NES(MI). The NES(MI) will also discuss any consultation required with other agencies to obtain project approvals and environmental permits, if necessary.

Deliverables:

- One electronic copy of the BSA map; one electronic copy and up to five hard copies of the Natural Environment Study (Minimal Impacts).

Disclosure

If Caltrans identifies the need for preparation of additional technical studies/documentation as part of the PES and/or Caltrans field review process, GPA will complete these studies under a separate scope of work. The potential technical studies or documentation could encompass the following:

- Hazardous Material, Phase I Initial Site Assessment (ISA)
- Construction Noise Memorandum
- Natural Environmental Study
- Federal Endangered Species Act Consultation
- California Endangered Species Act Consultation
- Tree Inventory

Assumptions

This scope has been prepared based on the following assumptions:

- This scope of work is based on the project information provided by the City/design engineering team. If the limits of the project area or scope of the project change substantially, GPA will provide an additional scope of work and budget to support this effort.
- A high-resolution aerial map with the project boundaries will be provided by the engineer for GPA use in the APE, BSA, and other maps.
- Thirty five percent plans and associated CAD/MicroStation files will be provided prior to initiating

technical studies.

- It is anticipated that a NES(MI) would be the appropriate level of documentation required; however, pending Caltrans review, a NES may be required.
- The NES(MI) scope assumes that the surveys will be completed over one day using a combination of windshield surveys and periodic "boots on ground" spot checking for verification
- The NES(MI) scope assumes that there will be minimal mapping needs.
- Focused wildlife surveys to determine presence/absence of federally or state threatened and endangered species, if required, are not included in this scope of work. If it is determined that the project could result in impacts on any federally or state listed threatened or endangered species, consultation with the USFWS and/or California Department of Fish and Wildlife (CDFW).
- Protocol-level surveys for special-status wildlife species, if required, are not included in this scope of work. It is anticipated the presence or absence of special-status wildlife species can be inferred based on the field surveys scoped for the project. If protocol surveys are requested, GPA will provide an additional scope of work and budget to support this effort.
- Waters of the U.S. and state are not expected in the project area and therefore, a comprehensive jurisdictional delineation, jurisdictional delineation report and completion of regulatory permits are not included in this scope of work. If requested, GPA will provide an additional scope of work and budget to support these efforts.
- Any rights of entry required to conduct field surveys within the entire BSA will be provided.
- Up to three rounds of comments on each deliverable. If responses to additional comments are requested, GPA will provide an additional scope of work and budget to support this effort.
- The City would be responsible for providing all fees associated with any Incidental Take Permit applications and any CDFW, USFWS, SJMSCP or other regulatory agency obligatory compensatory mitigation.
- Two days of surveys with a team of two biologists will be sufficient is anticipated to be necessary for completion of the NES (MI).
- Environmental monitoring support during construction is not included in this scope. If requested, GPA will provide an additional scope of work and budget to support these efforts.
- GPA assumes that the City will be responsible for paying the required CEQA filing fees.
- The City would complete required notification to Native American tribes, as well as any requested consultation, pursuant to the requirements of AB 52. The GPA team is available to complete these tasks on behalf of the City, if requested, under a modified scope of work and budget.
- No regulatory agency permits would be required for the project.

(CALCULATIONS FOR ANTICIPATED SALARY INCREASES)**1. Calculate Average Hourly Rate for 1st year of the contract (Direct Labor Subtotal divided by total hours)**

| Direct Labor Subtotal per Cost Proposal | Total Hours per Cost Proposal | | Avg Hourly Rate | 5 Year Contract Duration |
|--|----------------------------------|---|--------------------|-----------------------------|
| \$1,859.14 | 44 | = | 42.25318182 | Year 1 Avg Hourly Rate |

2. Calculate hourly rate for all years (Increase the Average Hourly Rate for a year by proposed escalation %)

| | Avg Hourly Rate | | Proposed Escalation | | | |
|--------|--------------------|---|---------------------|---|---------|------------------------|
| Year 1 | \$42.25 | + | 5.0% | = | \$44.37 | Year 2 Avg Hourly Rate |

| Year 4 | \$48.91 | + | 5.0% | = | \$51.36 | Year 5 Avg Hourly Rate |

3. Calculate estimated hours per year (Multiply estimate % each year by total hours)

| | Estimated % Completed Each Year | | Total Hours per Cost Proposal | | Total Hours per Year | |
|--------|------------------------------------|---|----------------------------------|---|-------------------------|------------------------|
| Year 1 | 100.00% | * | 44.0 | = | 44.0 | Estimated Hours Year 1 |

| Year 5 | 0.00% | * | 44.0 | = | 0.0 | Estimated Hours Year 5 |
| Total | 100% | | Total | = | 44.0 | |

4. Calculate Total Costs including Escalation (Multiply Average Hourly Rate by the number of hours)

| | Avg Hourly Rate (calculated above) | | Estimated hours (calculated above) | | Cost per Year | |
|---|---------------------------------------|---|---------------------------------------|---|---------------|------------------------|
| Year 1 | \$42.25 | * | 44 | = | 1859.14 | Estimated Hours Year 1 |
| Year 2 | \$44.37 | * | 0 | = | \$0.00 | Estimated Hours Year 2 |
| Year 3 | \$46.58 | * | 0 | = | \$0.00 | Estimated Hours Year 3 |
| Year 4 | \$48.91 | * | 0 | = | \$0.00 | Estimated Hours Year 4 |
| Year 5 | \$51.36 | * | 0 | = | \$0.00 | Estimated Hours Year 5 |
| Total Direct Labor Cost with Escalation | | | | = | \$1,859.14 | |
| Direct Labor Subtotal before Escalation | | | | = | \$1,859.14 | |
| Estimated total of Direct Labor Salary | | | | = | \$0.00 | Transfer to Page 1 |

NOTES:

1. This is not the only way to estimate salary increases. Other methods will be accepted if they clearly indicate the % increase, the # of years of the contract, and a breakdown of the labor to be performed each year.
2. An estimation that is based on direct labor multiplied by salary increase % multiplied by the # of years is not acceptable. (i.e. \$250,000 x 2% x 5 yrs = \$25,000 is not an acceptable methodology)
3. This assumes that one year will be worked at the rate on the cost proposal before salary increases are granted.
4. Calculations for anticipated salary escalation must be provided.

IMPORTANT NOTES:

1. List direct cost items with estimated costs. These costs should be competitive in their respective industries and supported with appropriate documentations.
2. Proposed items should be consistently billed directly to all clients (Commercial entities, Federal Govt., State Govt., and Local Govt. Agency), and not just when the client will pay for them as a direct cost.
3. Items when incurred for the same purpose, in like circumstance, should not be included in any indirect cost pool or in the overhead rate.
4. Items such as special tooling, will be reimbursed at actual cost with supporting documentation (invoice).
5. Items listed above that would be considered "tools of the trade" are not reimbursable as other direct cost.
6. Travel related costs should be pre-approved by the contracting agency.
7. If mileage is claimed, the rate should be properly supported by the consultant's calculation of their actual costs for company vehicles. In addition, the miles claimed should be supported by mileage logs.
8. If a consultant proposes rental costs for a vehicle, the company must demonstrate that this is their standard procedure for all of their contracts and that they do not own any vehicles that could be used for the same purpose.

2.
