City of Stockton  
Urban Water Management Plan  
Council Water Committee  
ITEM 26-0418  
April 9, 2026

# Previous Discussions..

## What is an Urban Water Management Plan (UWMP)?

An assessment of the reliability of water sources over a 20-year planning time frame

Planning tool that ensures adequate water supplies are available to meet existing and future water needs.

Foundational document for Water Supply Assessments for proposed development projects (as required by SB 610 and SB 221)

## Why is the UWMP required?

1983 Urban Water Management Planning Act. Required every five years.

Required for State grants and loan eligibility

Applies to any urban water supplier (Supplier) providing water for municipal purposes to more than 3,000 customers or serving more than 3,000 acre-feet annually

# Urban Water Management Plan (UWMP) Progress

Presented to  
Council Water  
Committee on  
March 12, 2026

Presented to  
Water Advisory  
Group on April 1,  
2026

Draft in review  
with City staff

# The Urban Water Management Plan will be available for review on the City's Water Quality webpage

Draft will be posted by April 12, 2026

Review period from April 12 – June 9, 2026

Public hearing at City Council Meeting on June 9, 2026

Due to DWR by July 1, 2026

## Water Quality

Print this page

Our area watersheds and groundwater wells provide raw water supplies to the City. As water flows over the land or through the groundwater aquifer, naturally occurring minerals can dissolve in it and, in some cases, contaminant materials can also be picked up from animal or human activities.

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency (USEPA) and the State Water Resources Control Board (State Water Board) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems.

### Water Quality

- [2024 Annual Drinking Water Quality Report](#)
- [2025 Drinking Water Public Health Goals Report](#)

### Water Service

- [About Your Address](#) - Find your water service provider and garbage pickup date.
- [Utility Billing Customer Service](#) - Start/stop water service within the City's MUD Water Service Area.
- [Water Fee Estimator](#) - Calculate estimated fees if in City's service area.

### Water Facts

To learn more about the City water at the Delta Water Supply Project, the City's water treatment plant, email [WaterFacts@stocktonca.gov](mailto:WaterFacts@stocktonca.gov) or call (866) 786-5987.

Participation requires completion of [Tour Request Form](#) and [Release of Liability Form](#).

### Water Resources Planning

- The [2015 Urban Water Management Plan](#) (UWMP) supports long-term resource planning and ensures adequate water supplies are available for current and future water demands. Every urban water supplier that provides over 3,000 acre-feet of water annually or serves more than 3,000 or more connections is required to assess the reliability of its water sources.
- The [2020 Urban Water Management Plan](#) draft and the [Water Shortage Contingency Plan](#) were approved by City Council during a public hearing on June 8, 2021.
- The UWMP evaluates the availability and reliability of water supplies and current and projected water use to help ensure reliable water service under different conditions. UWMPs also evaluate conditions for the next 20 years to ensure continued long-term planning. The Urban Water Management Planning Act requires the City to prepare a UWMP every five years and submit to the California Department of Water Resources.
